

To whom it may concern,

My name is Stefan Olson I reside in Arizona, I am a citizen of the United States, a United States veteran and a customer of XM Radio. I pay a subscription fee to XM Radio and therefore I believe I have the right to inform you that I would like you to reject the NAB's petition 04-160. I choose XM radio because it gave me immediacy, I listen to anything I want any time that I want. When I first subscribed to the service I realized what a great service XM provides to its customers and to the majority of the subscribers that live in the major cities that XM Instant Traffic and Weather covers.

When I didn't have this service I was always playing with the radio dial, stuck listening to some shock jock, or a radio station that plays music that I do not care to be listening to. I would task you to try and get a hint of traffic or a weather forecast from a radio station that is overrun by commercials or plays a format that I feel is not appropriate for my children to listen to. The free radio broadcasters only provided this information when it suited to increasing their ratings and will do just about anything to do so, I have no problem with that since it is a free service, unlike XM who's broadcast is paid for by a service fee and they are using it to provide a useful service to its customers. XM Instant Traffic and Weather is included in my service fee, it is a better service because it provides traffic and weather updates 24/7 so it is there when ever I would like to hear them and I only have to wait a few seconds or less to get the most updated and accurate traffic I have ever heard. I am truly impressed with this service.

I feel it is outrageous and utterly ridiculous that the NAB's petition 04-160 is attacking the XM corporation and its paying subscribers trying to take away a service that I pay for because I feel like it is providing a useful service to its me and all XM's customers, while keeping the roads safer. NAB is infringing on my rights as a paying XM customer.

I respectfully request that the FCC as a governing agency reject the petition 04-160 on behalf of myself and all XM's subscribers.

Respectfully yours,

Stefan Olson
